

MICROSAP® BIO ERW

TECHNICAL DATA SHEET

CHARACTERISTICS

Microsap® BIO ERW is a fluid microelement fertilizer designed to be easily transported within the plant. Microsap® Erw can be used preventively to strengthen the plant's natural defenses starting from the pre-flowering phase, throughout the flowering stage and after the fruit-setting period.

Microsap® Erw is suitable for fruit trees and horticultural and flower crops. Excellent applications on pome fruit, apple and pear trees. The product is not phytotoxic.

USE ALLOWED IN ORGANIC FARMING

Raw materials: Copper Oxychloride, Zinc Salt (Sulfate)

DIRECTIONS FOR USE

1.5 – 2 KG/HA

Respecting an application interval of 7-10 days. It is advisable to start with applications from the bud swelling stage to the post fruit-setting stage.

Use **800/1,100 liters per hectare** each application. Pour the product into the sprayer tank and reach the required volume with water. The product can be mixed with common insecticides and fungicides.

SHAKE WELL BEFORE USE

It is recommended working with a solution at $5.8 \div 6.5$ pH.

WARNINGS

To be used only in case of need.

Do not exceed the appropriate dosage. Do not mix product with EC formulations. Product is stable at standard temperature and pressure. Store at a temperature ranging between 5 °C and 30 °C. In case of spillage collect using sawdust and/or sand.
