

# MICROSAP® BIO FE

## TECHNICAL DATA SHEET

### CHARACTERISTICS

**MICROSAP® BIO FE** is an iron-based foliar fertilizer that, thanks to the synergy with the innovative Microsap® crystals, promotes an easy and immediate absorption by the plant, optimizing its nutrition.

### USE ALLOWED IN ORGANIC FARMING

Raw materials: iron (sulfate) salt.

### DIRECTIONS FOR USE

- **VINES**  
0.5 – 1 kg/ha
- **FRUIT TREES**  
0.5 – 1 kg/ha

Use a volume of water of no less than 400 L/hectare.

Pour the product into the sprayer tank and reach the required volume with water. Do not acidify.

### FERTIGATION

During fertigation use 3 – 5 kg/ha for:

#### HORTICULTURAL CROPS

STRAWBERRIES

TOMATOES

WATER MELON and CANTALOUPE

ZUCCHINI

LEAFY GREEN VEGETABLES (lettuce, spinach, etc.)

OTHER VEGETABLES

OTHER CROPS

### SHAKE WELL BEFORE USE

It is recommended working with a solution at 5.8 ÷ 6.5 pH.

### WARNINGS

**To be used only in case of need.**

Do not exceed the appropriate dosage.

Store at a temperature ranging between 5 °C and 30 °C. Product is stable at standard temperature and pressure. In case of spillage collect using sawdust and/or sand.

### AVAILABLE FORMATS:

#### BOTTLE

NET WEIGHT: 1 KG

#### CANISTER

NET WEIGHT: 10 KG

### EC FERTILIZER

Fertilizer based on microelements

Iron (Fe) fertilizer solution

Water Soluble Iron (Fe) ..... 4.5%

Iron Sulfate Heptahydrate: CAS 7782-63-0
