

MICROSAP® BIO RESOLV

TECHNICAL DATA SHEET

CHARACTERISTICS

Microsap® BIO RESOLV is a cutting-edge product for a fertilization strategy that ensures healthy and balanced plant growth. Microsap® BIO RESOLV is a Copper sulfate and Zinc sulfate-based product. The elements it contains are absorbed by the trunk and by the young organs of the plant reaching the tissues and strengthening the plant's defenses while also activating its natural resistance. The product strengthens damaged tissues and enriches the plant with nutrients. Once Microsap® BIO Resolv is in the soil, it is a source of mineral salts for the plant.

USE ALLOWED IN ORGANIC FARMING

Raw materials: copper oxochloride, zinc salt (sulfate)
