MICROSAP®

LINFA

TECHNICAL DATA SHEET

CHARACTERISTICS

Microsap® LINFA is a product based on microelements which, thanks to the innovation and technology of the formulation, allows a high level of photosynthetic and nutritional efficiency of plants. MICROSAP® LINFA acts both at root level and as a foliar spray on the growth and health of plants, allowing increased resistance to biotic and abiotic stress.

Activated with 0.1% humic extracts from leonardite. Extraction medium: KOH.
